Educational Organisation Using ServiceNow

Team ID:**PNT2025TMID12901**
Project Name: Educational Organisation Using ServiceNow

Educational Organisation Using ServiceNow is about creating a digital system to manage student information and academic processes using ServiceNow. It allows an institution to handle admissions, store student details, maintain unique records, and track student progress through customized tables and forms. With process flows and scripts, it automates tasks like admission updates and result entry, making the overall management of students more efficient and organized.
